

Killarney Lakeside Pump House Project Campaign

Killarney Lakeside Golf Course is committed to the pumphouse replacement project. The pumphouse is a critical asset to the operations of our golf course. One that if we don't invest in will cause us a lot of issues in the operations of our golf course.

The reason for this project:

- To replace the aging equipment.
- Separate the electrical and plumbing for safety reasons as per the audit.
- Improve the day-to-day operations and lower the operational costs.
- To solve the blow out issues we are having with the pumps.

Scope of the project:

- New pumphouse
- Pumps and Filters
- Plumbing and Electrical

The cost of the project is estimated at \$95,000. The biggest part of the project costs are the pumps and filters. At this time, we are asking for your consideration to contribute to this campaign to ensure our golf course offers the best conditions possible. To date we have received \$56,000 from the Killarney Foundation, Killarney Kinsmen and Killarney Elks. We are seeking your support for the remaining \$39,000. KLGCC has entered an agreement with the Municipality of Killarney-Turtle Mountain to provide tax deductible receipts for donations \$100 or over.
